Available space	Total: 21'000m ² , minimum unit as of 200m ² , maximum unit up to 8'600m ²
Available as of	2022
Rent per m ² / year	On request

Project

In close neighbourhood to the University of Applied Sciences „NTB Buchs“ attractive and flexible spaces for every stage of a companies development are being developed. From the start-up phase, to product development, sales or serial production – you will find spaces fitting your needs. The precision center will focus on companies with industrial skills, which are typically found in the region already: precision mechanics and manufacturing, materials engineering, electrical and power engineering, optics and electronics. Production halls, infrastructure for research labs as well as offices and representative meeting- or showrooms are planned –as well as further shared infrastrucre.

Within the planned infrastructure, you will be able to implement an individually tailored to your needs space quickly, depending on your needs: available as from Autumn 2016.
